ILLUSTRATED COIN CATALOGUES, ETC.

Having purchased all of Mr. Strobridge's stock of Catalogues, I am able to offer here a series of great variety and value. Mr. S. was accustomed to print of his catalogues a small edition, usually twenty-five, but frequently no more than ten, in extra style; many of these were used for gifts, and a few were sold, but for years past one has seldom been seen. Of some I have none remaining, and few of any; all are priced, and in perfect order.

1053 1842 Obv., *splendid proof, though reverse is tarnished and not well struck up, extremely rare.*

Whether this Half Cent was struck in 1842 or at a period subsequent to 1849, but about that time, as one writer informs us, or whether it is a still more recent manufacture of the Mint, I am not prepared to say. A vast amount of cheap learning has been wasted on the subject, the statement having been made, and generally believed, that for the last issue of the rare Half Cents the reverse die of 1836 was used. I confess

I have not yet seen an 1831 or 1836 Half Cent without its appropriate reverse; of course I do not question the existence of such, but it seems to me, that with the Mint method of striking, there would be great practical difficulty in combining two dies so unlike in size as the obv. of the 1831 and the reverse of the 1836 Half Cent. I am aware, however, of the great resources of the Mint of the United States for the manufacture of all such oddities; nothing emanating from that factory will ever again strike a collector with wonder. To return to the statement concerning the 1856 reverse, I have to say, I have compared the reverses of many of the so-called restruck Half Cents in the forties with the reverse of the 1856, and I have never yet found one with that reverse. A comparison of Nos. 1053 and 1054 with 1061 in this sale, at once reveals the difference. The trifling addition made to the number of Half Cents from 1840 to 1848 inclusive, by the last issue, does not prevent each and every one, and especially 1842 and 1847, from being extremely rare.

1054 1847 *Splendid proof*; reverse tarnished. This piece does not ring, but is guaranteed genuine; *extremely rare.*

ANNOUNCEMENT.

THE Greek, Roman and Foreign Collection of Mr. WILLIAM J. JENKS, of Philadelphia, will be sold by Messrs. Bangs & Co., in New York, early in January, probably on the tenth and following days. The manuscript is now in the hands of the printer, and it is hoped the catalogue will be ready for distribution by the twentieth of December. A few copies will have two Heliotype plates, one illustrating Greek and Roman, the other the large silver coins of England, especially the crowns and ten and twenty shilling pieces, for which Mr. Jenks's collection is noted. These catalogues will be sent only to order, and the price will be 50 cents each. An edition of fifty copies will also be published on extra heavy tinted paper, will contain two heliotype plates, will be priced and sent by mail for $1.25 each.

Immediately after the sale of the Jenks collection will be sold the collection of Modern Indian Implements, Dresses and Curiosities, together with a remarkable collection of Pistols, etc., formed by Dr. T. S. Hitchcock, formerly of Tucson, Arizona, now of Denver, Colorado.

Of this (the Mercer catalogue) a few copies will be bound with a heliotype plate; these will be sent to order for 30 cts. each, and thick paper copies with the plate will be sent, priced, as soon after the sale as practicable, for $1 each.

Of the Haines catalogue, thick paper, illustrated, none remain for sale: thin paper copies, illustrated, and priced, are for sale, at 75 cts. a copy.

The sale of two other large collections will be duly announced, but sufficient progress has not been made to allow of the time being fixed.
